Biotechnology Technician

PlantForm Corporation has an immediate opening for a Biotechnology Technician. The position is available for candidates with knowledge of plant growth and greenhouse operations. Tasks will involve growth of genetically modified tobacco species to support production processes in greenhouse and contained growth systems. Practical experience in seeding, transplant and maintenance of plants; growth of bacteria; and preparation of culture media, fertilizer solution, and buffers is an asset.

The successful candidate will have a college diploma in biotechnology, or other relevant discipline. The position will also require diligent maintenance of laboratory notebooks and process documentation.

PlantForm Corp. operates its research laboratories in Guelph and Bolton, ON, and offers a competitive salary, a benefits program, a stimulating and supportive research team and environment, and room for advancement. The initial position will be for 4 months, with the possibility that the successful candidate may be hired for a full-time technical position within the company.

PlantForm Corporation is an equal opportunity employer committed to providing a work environment that is inclusive and free of employment barriers and discrimination. A Human Resources representative is available to consult with qualified applicants with a disability who request an accommodation during the recruitment process. Information received regarding the accommodation needs of applicants will be addressed confidentially.

Interested applicants should provide a cover letter stating research experience, career goals and availability; and curriculum vitae.

Only those candidates invited for an interview will be contacted.
